

April 13, 2008

Dear Reactis User:

If you attend the SAE World Congress this week, please stop by booth 1320 to see the latest enhancements to Reactis and Reactis for C Plugin. The event will be held April 14-17, 2008 at the Cobo Center in Detroit, Michigan. Members of the Reactive Systems technical team will demonstrate Reactis, the company's testing and validation package for Simulink/Stateflow models as well as the recently launched Reactis for C Plugin. The latter tool integrates seamlessly with Reactis to offer white-box analysis of the C code portions of models (S-Functions and Stateflow custom C code).

Best Regards,
The Reactis Team
